

Wheelchair Dimensions

No.	Description	Note	Dimensions in cm
1	Seat Mechanism Height	Measure from the floor to the highest point of the armrest.	
2	Length without footrests	If possible, remove the footrests and measure the length to the rearmost point.	
3	Total length	Measure from the frontmost point to the rearmost point of the wheelchair.	
4	Overall height	Measure from the floor to the top edge of the handles.	
5	Folded Dimensions	Measure the wheelchair when fully folded from one handrail to the other.	
6	Width when open	Measure the wheelchair from grip ring to grip ring when it is open.	

Note: If you are unsure, you can also send photos of the wheelchair so we can check compatibility more quickly.
